

Orthoplex White FemmeBiotic™ Clinical Stability

FemmeBiotic™ Clinical has been formulated strictly for clinical practitioners only and has been designed to deliver exceptional quality by ensuring a guaranteed 9 billion Colony Forming Units in each capsule. To maintain this potency and efficacy it is recommended FemmeBiotic™ Clinical be kept refrigerated below 8°C.

However, FemmeBiotic™ Clinical has been specifically formulated to allow for transportation outside of a refrigerated environment. FemmeBiotic™ Clinical is found to be stable for 7 days out of refrigeration at a temperature of 30°C.

So, whilst transporting with icepacks is desirable, **FemmeBiotic™ Clinical sent in unrefrigerated packs, or left out on the shelf, displays no discrepancies with efficacy or potency of the product.**
