Orthoplex White ImmunoBalance Biotic Stability

ImmunoBalance Biotic capsules have been formulated for clinical practitioners only and are designed to deliver exceptional quality by ensuring a guaranteed 31 billion Colony Forming Units (CFU) in each capsule. To preserve this potency and efficacy it is recommended ImmunoBalance Biotic be kept refrigerated below 8°C.

However, ImmunoBalance Biotic has been specifically formulated to tolerate short term temperature increases to allow for transit outside of refrigeration. Stability testing has shown that the CFU count is above the stated levels on the label after 7 days at a temperature up to 30°C.

So, whilst transporting with icepacks is desirable, **ImmunoBalance Biotic sent in unrefrigerated packs, or left on the shelf, displays no discrepancies with efficacy or potency of the product.**
